

PQI's Fall Conference a Great Success!!

PQI's Sales Representatives from across the USA gathered in Tampa for two days of training.

New DOE 2016 Transformer Efficiency Standard were discussed and PQI's continuing efforts to provide products that exceed all current and proposed standards were highlighted – PQI continues to provide industry leading efficiencies and harmonic mitigating solutions across North America and around the world.

Several PQI's Rep.'s discussed their successes with PQI products to the benefit of all those gathered. PQI also introduced some exciting new products and value added features to existing products.

Class of 2015

PQI Supplies Medium Voltage, Cast Coil HMTs & Zero-Sequence Harmonic Filters to Wynn, Macau, China

PQI provided a number of Medium Voltage Class, UL Listed, Cast Coil Harmonic Mitigating Power TransFilters™ for the new Wynn Casino & Hotel in Macau, China. PQI is the only supplier of these products in the world. As part of our PQI Solution™, we also supplied a variety of IoFilers™.

PQI Engineers worked closely with Wynn's Consulting Engineers to provide a PQI Solution™, with guaranteed power quality outcomes, harmonic current reductions and improved load efficiencies.

PQI was also a member of the commissioning team to ensure planned product placements and solution outcomes.
